Title Slide on Teal background with Bitmoji accent image	How to Customize Your Google Classroom Header Image Using a Custom Bitmoji Banner	In this video, you will learn how to customize your Google Classroom header image using a custom Bitmoji banner to add a little fun and flair to your Google Classroom!	Music starts and fades out to blend in with the next screen.
Google Classroom Stream Page		From your "Stream" page in your Google Classroom, find the "Customize" button. Clicking on that button brings you to the following screen. You'll notice you have the option to choose "select photo" or "upload photo". To use a custom Bitmoji banner, you will first need to create your custom Bitmoji banner! Here's how to do that!	
Show New Google Slide file		Open a new Google Slide file to create your banner.	

Show Bitmoji Banner slides in Google Slides. Show different options.		Now, I'm going to show you a few designs I've been playing around with. Now, if you don't have your Bitmoji set up yet, you can still follow these steps to create a custom banner you just won't add in your Bitmoji image. You may notice that my layout is long and thin with the images focused on the right side. Let's pop back over to Google Classroom and see why I've done this.	
Return to Google Classroom Stream Page		Notice how the title of your class is on the left side of the image. So, you will want to keep the details of your custom banner on the right side of your banner.	
Show Bitmoji Banner slides in Google Slides.		Now, let's look at the three options I've created. (Stars) This is the simplest option. For this option, I left the background white but added in some star clipart for some extra color. (Pencils) I bumped it up a notch here with a colored pencil slide background, but kept the rest of my design fairly simple with just my Bitmoji image inserted on the right	

		side. To change the slide background, you'll want to click the slide button in your toolbar, search google images, and then type in what you are searching for. (chalkboard) My 3rd design has a chalkboard background along with my Bitmoji and some layered clipart. Remember to include the word "transparent" in your clipart image search so you can layer those images like stickers without any white surrounding them. Now, let's head back to Google Classroom and see how they look!	
Google Classroom Stream Page		Okay, so we'll click on customize and choose upload image and try out my first option. You'll notice that you can expand the size of the field just a bit and move it around to fit your banner image in the way that you like best. Then simply click the blue select class theme button and you're almost done! I think I'll choose blue for my theme color with this one. So, you can see the smaller stars do show up behind the title, but they're not too distracting, so that can work.	

		Now let's try my design with the colored pencil background. We'll go through the same steps. I think I'll try teal for the them color. Okay, I like it! And, for the final option - the chalkboard background with the clipart "stickers". Choosing green for my theme color this time. Ooh - I think this one's my favorite	
Title Slide		Alright! Now you know how to customize your Google Classroom header image using a custom Bitmoji background.	Fade in Music
Return to Google Classroom Stream Page with new header image		I hope you enjoy this chance to be creative and have fun. Your students will love it!	Music fades out
